

▶ 活性炭系列产品简介

贝森环保活性炭系列产品为公司主要核心优势产品之一；产品外表美观、结构强度好、废气处理性能行业优先；产品选用优质活性炭基础材料，通过贝森环保独特配方调制，实现吸附与分解同步进行，大大提到了活性炭的使用寿命，实现产品性能行业领先；产品采用：铝蜂窝芯、海绵、铝箔网、塑料蜂窝芯、纸瓦楞等材料为载体，采用铝型材、黑卡纸（或其他颜色纸张）、海绵条、不锈钢等材料为产品封边材料，实现在不同使用场景的最佳使用效果；

贝森环保通过对配方、载体等的严格控制与要求，实现公司活性炭系列产品快速吸附、高效分解，极大的提高了甲醛、臭氧、油漆废气、tvocs 气体的吸附与分解效率，最大可能适应各种工况条件的产品使用。

Besin environmental protection activated carbon series products as one of the company's main core products;The product appearance is beautiful, the structure strength is good, the exhaust gas treatment performance industry is preferred;The product is made of high quality activated carbon base material, and the absorption and decomposition are carried out synchronously through the unique formula of besin environmental protection. The service life of activated carbon is greatly mentioned to achieve the leading product performance in the industry.The product adopts: aluminum honeycomb core, sponge, aluminum foil net, plastic honeycomb core, paper corrugated and other materials as the carrier, and adopts aluminum profile, black card paper (or other color paper), sponge strip, stainless steel and other materials as the product edge sealing materials, to achieve the best effect in different use scenarios;

Through strict control and requirements on formula, carrier, etc., besin environmental protection has realized rapid adsorption and efficient decomposition of the company's activated carbon series products, greatly improving the adsorption and decomposition efficiency of formaldehyde, ozone, paint exhaust gas, and tvocs gas, so as to adapt to the use of products under various working conditions.
