

▶ 冷触媒系列产品简介

贝森环保冷触媒系列产品为公司主要核心优势产品之一；产品外表美观、结构强度好、洁净空气性能行业优先；产品通过贝森环保独特配方调制,实现产品性能行业领先；产品采用：铝蜂窝芯、海绵、铝箔网、发泡陶瓷、发泡金属、瓦楞纸等材料为载体，采用铝型材、黑卡纸(或其他颜色纸张)、海绵条、不锈钢等材料为产品封边材料，实现在不同使用场景的最佳使用效果；

贝森环保通过对配方、载体等的严格控制与要求，实现公司冷触媒系列产品实现高效的催化作用，极大的提高了甲醛、苯、二甲苯、甲苯、tvocs 气体的处理效率，最大可能适应各种工况条件的产品使用。

Besin environmental protection cold catalyst series products as one of the company's main core advantage products;The product appearance is beautiful, the structure strength is good, the clean air performance industry is preferred;Beson environmental protection products through the unique formula modulation, product performance to achieve the leading industry;Products: aluminum honeycomb core, sponge, aluminum foil mesh, foaming ceramics, foaming metal, corrugated paper and other materials as the carrier, using aluminum profile, black card paper (or other color paper), sponge strip, stainless steel and other materials as the product edge sealing materials, to achieve the best use in different scenarios;

Through strict control and requirements on formula, carrier, etc., besin environmental protection achieves efficient catalytic effect of the company's series of cold catalyst products, which greatly improves the processing efficiency of formaldehyde, benzene, xylene, toluene and tvocs gas, and maximally ADAPTS to the use of products under various working conditions.
