

## ▶ 空气净化系列产品简介

贝森环保室内空气净化系列产品是我公司核心产品之一，主要用于室内空气净化，如空气净化器、新风系统、汽车、吸尘器、空调等；主要功能是针对室内空气中的各种有害物质，如：甲醛等有害气体、PM2.5等悬浮颗粒物、有害菌、花粉、烟尘等。

室内空气净化产品主要有：HEPA滤网、中效滤网、初效滤网、除菌滤网、夹炭布滤网、填充活性炭颗粒(或其他颗粒)滤网、复合滤网、筒状及其他异形滤网。

产品可根据客户要求订制、适配市场上主流的空气净化器等空净产品。该系列产品可提供相应的试验检测。同时公司建有标准的实验舱、无尘车间。

Besin environmental protection indoor air purification products are one of the core products of our company, mainly used for indoor air purification, such as air purifier, fresh air system, automobile, vacuum cleaner, air conditioning, etc. The main function is for various harmful substances in the indoor air, such as: formaldehyde and other harmful gases, PM2.5 and other suspended particles, harmful bacteria, pollen, smoke and dust.

Indoor air purification products mainly include: HEPA filter, medium effect filter, primary effect filter, degerming filter, carbon cloth filter, activated carbon particle (or other particles) filled filter, composite filter, tubular and other shaped filter.

Products can be customized according to customer requirements, adapt to the market's mainstream air purifier and other air purifier products. This series of products can provide the corresponding test detection. At the same time the company has a standard laboratory module, dust-free plant.
